REF:KFS/MS/PROD/3/Vol.1/92

22ND JANUARY, 2024

TO THE CHAIRMAN
NATIONAL GOVERNMENT CDF OFFICE
MAARA CONSTITUENCY

RE: REHABILITATION AND RESTORATION OF THE DEGRADED MWIMBI HILLS FOREST

Kenya Forest Service officers will accord the Ngedf office the necessary technical assistance and support like tree species selection and supervision. This is during the tree planting to rehabilitate and restore the degraded Mwimbi hill ecosystem to promote conservation of biological diversity and to fulfill the ecosystem functions for all life on earth. This will be achieved by planting indigenous tree species which are suitable to the soils and the climatic conditions of the area. A few of these tree species are as follows:-

- *Vitex keniensis* (Muuru)
- *Makhamia lutea* (Muu)
- *Cordia Africana* (Muringa)
- *Croton megalocarpus* (Mukinduri)
- *Terminalia Indica* (Muthithi)
- *Senna siamea* (Mkecia)
- *Mexican green ash*
- *Zysygium guinesis* (Muriru)
