- b) The chairman invited the DCC who was present and was directly linked to the said projects to respond.
- c) The DCC explained to the committee that main challenge has been availability of land. To begin with, the original place where the assistant chief for Southern sub-location had constructed a temporary office was for the County and the temporary structure was since demolished. Though he explained to the committee that he had since found a place, within the DCC's compound just besides the Administration Police office and that is where the chief's office would be erected.
- d) Additionally, Kanyakwar assistant chief's office will soon be implemented. However, the land issue is still in the process. Uzima University had accepted to donate land and the University Board of Management had given the go ahead through official minutes plus correspondence. The part still remaining is the sub-division so that the donated piece of land is registered in the name of the department.
- e) The committee were very happy with the progress and urged the DCC to officially communicate the same through correspondence to the CDF office to facilitate the implementation process.
- f) Being no matter arising, the meeting proceeded to the main agenda

1.0 Introduction

CDF Act 2015 Section 27 (1) states that the chairperson of the Constituency committee shall, within the first year of the commencement of a new parliament and at least once every two years thereafter, convene an open forum public meetings in every ward in the constituency to deliberate on development matters in the ward and in the constituency.

The NG-CDFC shall then deliberate on project proposals from all the wards in the constituency and any other projects which the Constituency Committee considers beneficial to the constituency, including joint projects with other constituencies, consider the national development plans and policies and the constituency strategic development plan, and identify a list of priority projects, both immediate and long term, out of which the list of projects to be submitted in accordance with the Act shall be drawn from.

CDF Act 2015 Sec 3 (d) states that provide for the participation of the people in the determination and implementation of identified national government development projects at the constituency level pursuant to Article 10(2(a) of the Constitution. Subsection (n) stipulates that provide a platform for citizens participation in service delivery. Therefore, Citizen Participation in project planning, management and implementation planning requires the involvement of concerned stakeholders. This includes identifying public concerns and values and developing a broad consensus on planned initiatives. It is also about utilizing the vast amount of information and knowledge that stakeholders hold to find workable, efficient and sustainable solutions.

Public participation encompasses a range of procedures and methods designed to consult, involve, and inform the public to allow those that would be potentially affected by a decision or policy to have input into the process. Community participation motivates the stakeholders to work together, recognize the benefits of their involvement and own the projects in their localities.

Stakeholders play a central role in setting up priorities and objectives of development Initiatives in order to ensure relevance and appropriateness. It is important that all stakeholders are involved

in the development of projects and not just direct beneficiaries of an initiative.

1.1 Background of NG-CDF

The Constituencies Development Fund (CDF) was established under the Constituencies Development Fund (CDF) Act, 2003, amended in 2007 and repealed by the CDF Act of 2013. In 2015, the CDF Act of 2013 was declared unconstitutional and a new Act was enacted in 2015, being the National Government Constituencies Development Fund Act.

NG-CDF Act, 2015. The National Government Constituencies Development Fund (NG-CDF) is under the Ministry of Devolution and Planning.

The Constituency Development Fund (CDF) was introduced in Kenya in 2003 with the passage of the CDF Act 2003 by the 9th Parliament of Kenya which was repealed in 2013 by the CDF Act 2013. The CDF Act provides that the government set aside at least 2.5% of its ordinary revenue for disbursement under the CDF program.

The fund was designed to support constituency-level, grass-root development projects. It was aimed to achieve equitable distribution of development resources across regions and to control imbalances in regional development brought about by partisan politics. It targeted all constituency-level development projects, particularly those aiming to combat poverty at the grassroots and entrench equitable distribution of development.

The objective of the Fund is to provide mechanisms for supplementing implementation of the National Government development Agenda at the constituency level.

The CDF program has facilitated the putting up of new water systems, health and education facilities in all parts of the country, including remote areas that were usually overlooked during funds allocation in national budgets.

3.8 Conclusion

- ✓ The meeting vested the area member of national assembly with the responsibility of appealing to the NG-CDF Board to release funds to the constituency in time within the financial year to help projects implementation and payment of school fees to bright but needy students.
- ✓ Frequent development forums should be held to give the public information concerning the development initiatives being undertaken by all the development partners and the various funding agencies.
- ✓ There should be a joint forum where NG-CDF, County Government and other development stakeholders plan together to avoid duplication of projects.
- ✓ The meetings resolved that ongoing projects shall be given priority so that they are all completed
