1.0 INTRODUCTION

The NG-Constituency Development Act 2015 stipulates in part 5 section 27 subsection 1 and 2 that the chairperson of the NG-CDFC shall, within the first year of the commencement of a new Parliament and at least once every two years thereafter, convene open forum public meetings in every ward in the constituency to deliberate on development matters in the ward and in the constituency.

The NG-CDFC shall then deliberate on project proposals from all the wards in the constituency and any other projects which the Constituency Committee considers beneficial to the constituency, including joint projects with other constituencies, consider the national development plans and policies and the constituency strategic development plan, and identify a list of priority projects, both immediate and long term, out of which the list of projects to be submitted in accordance with the Act shall be drawn from. Thereafter, the list of proposed constituency based projects to be covered under this Act shall be submitted by NG-CDFC to the Board.

Public participation is the process that directly engages the concerned stakeholders in decision-making and gives full consideration to public input in making that decision.

Public's engagement is a vital part of many projects and the benefits of it are well documented, such as better outcomes for all stakeholders, community ownership and lower project costs. When the public is involved in a project, they feel motivated to work together, recognize the benefits of their involvement and have ownership of the projects and the decision making process, which is key to a successful project outcome and their sustainability.

Effective public engagement is about recognising that involving the public in a project is no longer about information dissemination and telling the people what is being done, but is a two-way information sharing tool. The more views gathered in the process of making a decision, the more likely the final product will meet the most needs and address the most concerns possible.

In summary stakeholders participation is important since:

- Providing information helps them understand the issues, options, and solutions available for the projects
- Consulting with the public aids in obtaining their feedback on alternatives or decisions
- Involving the public to ensures their concerns are considered throughout the decision process, particularly in the development of decision criteria, options and preferred solutions that are workable, efficient and sustainable .

Mission

To involve all the stakeholders in the development process of the Constituency in order to achieve the development standards.

Core Values

- Accountability
- Transparency
- Integrity
- Honesty

3.5.8 CHALLENGES

The public's overdependence on NG-CDF coffers and the NG-CDF Act's limitations on the types of projects that can be funded.

3.5.9 WAY FORWARD

The meeting agreed that financing for continuing devolved projects that NG-CDF had previously supported should be taken into account in order to use them if the county government is putting off finishing them.

3.6 WARD V: CENTRAL KASIPUL

The meeting took place on Thursday the 5th January, 2023, at Kachien South chief's compound at 10am and at North Kamagak chief's compound at 2pm

3.6.2 PRELIMINARIES

The meeting opened with a prayer, after which the area chiefs of the individual locations welcomed attendees and introduced the ward development committee members and other chiefs.

3.6.3 COMMENTS BY THE AREA CHIEFS

Since all of the initiated initiatives have been satisfactorily carried out, the chiefs praised NG-CDF efforts to promote development in the region and the constituency at large. They urged the NG-CDF to support more projects in the region because it is the only government fund felt by the electorate. He also urged the local member of parliament to mobilize other national assembly members to increase the constituency allocation because it is the only devolved fund felt by the electorate.

3.6.4 COMMENT BY THE NG-CDFC CHAIRMAN

He explained that devolved funds are founded on the credence that local implementers have a better grasp of community needs. To boost community involvement in local decision-making, improve government openness, increase government responsiveness, and raise the caliber of service delivery, decentralized funds were established.

3.6.5 COMMENTS BY THE DEPUTY COUNTY COMMISSIONER

Welcoming members to the meeting, he emphasized the value of community involvement in all development processes as well as the advantages of the bottom-up project identification method. In order to foster growth in their communities, he further urged the people to be excellent stewards of the NG-CDF.

3.6.6 COMMENTS BY THE FUND ACCOUNT MANAGER

She explained to the members the significance of the forum as provided for in the NG-CDF ACT 2015 and the types of projects that can be funded by the Fund, highlighting the need for projects that benefit the community as a whole and a diverse cross section of the population while excluding those that support individuals, political or religious organizations, or activities that are part of the county government's devolved responsibilities.

3.6.7 COMMENTS BY THE AREA MEMBER OF NATIONAL ASSEMBLY

In line with the constituency's vision and mission statements, he assured the attendees that he will be on the front lines of promoting development in the constituency. He urged the participants to advocate for positive development initiatives that would promote socioeconomic growth in the constituency and to shun regressive politics.

He committed to working with the county administration and other government organizations to promote fair resource distribution.

3.6.9 CHALLENGES

The majority of rural initiatives in the constituency now use NG-CDF solely as their cure-all, however, due to the restricted allocation, people' needs are not being satisfied as quickly as they would want.

3.6.10 WAY FORWARD

In order to avoid duplication, double funding, or concentration of identical projects in one location, the county assembly member for the area should also hold consultative meetings with all the stakeholders and generate project ideas from the participants.

3.7 CONCLUSION

- NG-CDF, County government and other development stakeholders should, from time to time, organize joint consultative forum to foster public participation.
- A resolution was reached that all the continuing projects be executed to the end for community's use.
- Project allocations should also be sufficient to enable project completion once it has begun since if completion is postponed, project costs will increase as a result of factors like inflation and wear and tear.
- The ability of Project Management Committees to carry out projects should be continually improved.
- The area Member of national assembly ought to champion and join hands with fellow legislators to advocate for additional funding from the exchequer.
- The public should be informed on the development activities being carried out by all the development partners and the various financing agencies through the holding of ongoing development forums.
