1.0 INTRODUCTION

The NG-Constituency Development Act 2015 stipulates in part 5 section 27 subsection 1 and 2 that the chairperson of the NG-CDFC shall, within the first year of the commencement of a new Parliament and at least once every two years thereafter, convene open forum public meetings in every ward in the constituency to deliberate on development matters in the ward and in the constituency.

The NG-CDFC shall then deliberate on project proposals from all the wards in the constituency and any other projects which the Constituency Committee considers beneficial to the constituency, including joint projects with other constituencies, consider the national development plans and policies and the constituency strategic development plan, and identify a list of priority projects, both immediate and long term, out of which the list of projects to be submitted in accordance with the Act shall be drawn from. There after the list of proposed constituency based projects to be covered under this Act shall be submitted by NG-CDFC to the Board.

Public participation is the process that directly engages the concerned stakeholders in decision-making and gives full consideration to public input in making that decision.

Public's engagement is a vital part of many projects and the benefits of it are well documented, such as better outcomes for all stakeholders, community ownership and lower project costs. When the public is involved in a project, they feel motivated to work together, recognize the benefits of their involvement and have ownership of the projects and the decision making process, which is key to a successful project outcome and their sustainability.

Effective public engagement is about recognizing that involving the public in a project is no longer about information dissemination and telling the people what is being done, but is a two-way information sharing tool. The more views gathered in the process of making a decision, the more likely the final product will meet the most needs and address the most concerns possible.

In summary stakeholders' participation is important since:

- Providing information helps them understand the issues, options, and solutions available for the projects
- Consulting with the public aids in obtaining their feedback on alternatives or decisions
- Involving the public to ensures their concerns are considered throughout the decision process, particularly in the development of decision criteria, options and preferred solutions that are workable, efficient and sustainable .

1.1 ABOUT NG-CDF

The Constituencies Development Fund (CDF) was established under the Constituencies Development Fund (CDF) Act, 2003, amended in 2007 and repealed by the CDF Act of 2013.

In 2015, the CDF Act of 2013 was declared unconstitutional and a new Act was enacted in 2015, being the National Government Constituencies Development Fund Act, NG-CDF Act, 2015. The National Government Constituencies Development Fund (NG-CDF) is under the Ministry of Devolution and Planning.

Imma G.

The Constituency Development Fund (CDF) was introduced in Kenya in 2003 with the passage of the CDF Act 2003 by the 9th Parliament of Kenya which was repealed in 2013 by the CDF Act 2013. The CDF Act provides that the government set aside at least 2.5% of its ordinary revenue for disbursement under the CDF program.

The fund was designed to support constituency-level, grass-root development projects. It was aimed to achieve equitable distribution of development resources across regions and to control imbalances in regional development brought about by partisan politics. It targeted all constituency-level development projects, particularly those aiming to combat poverty at the grassroots and entrench equitable distribution of development.

The objective of the Fund is to provide mechanisms for supplementing implementation of the National Government Development Agenda at the constituency level.

The CDF program has facilitated the putting up of new water systems, health and education facilities in all parts of the country, including remote areas that were usually overlooked during funds allocation in national budgets.

MIN 2: 25/09/2021: Discussion on proposal for projects funding 2021/2022 fy

i. Ongoing projects - Stalled

The committee observed that there were projects that were initiated by NGCDF as far as 2013-14 financial years on wards and are stalled. Due to demand from the community about the value of money, they were proposed for completion. The Ward meetings prioritized them for funding hence included in the list of ongoing projects. Those projects were for instance; Manga Model Girls school, St. Paul's Manga Orotuba secondary school and St. Paul's Gekano secondary school and Tombe Mixed secondary school

ii. Schools infrastructure

The committee agreed that most schools need renovations especially roof replacement (Irons sheets and Timber), plastering, steel doors and windows, floors, veranda and painting as a priority instead of constructing new classrooms.

It was further noted that some schools have bigger classrooms that can accommodate many students/pupils while others are small hence there will be variations in activities.

The committee agreed to allocate Kshs. 1,000,000 to each school for the renovations ranging from 5 to 6 classrooms depending on the activities, rooms capacity and the degree of repairs.

School buses. Due to change in quotation of chassis for the 2 school buses funded in 2020/2021 financial year, the difference had to be proposed and be considered for approval to enable completion of the school buses on purchase.

Secretary
Chairman

The committee therefore approved additional of Kshs. 1,150,000 per piece for the buses to make it a total of Kshs. 8.6 from 7.450m as was approved in previous financial year.

THE ENVIRONMENT AND SPORTS ACTIVITIES

(i) Environment

The committee agreed to continue planting trees in various schools and do toilets in 3 schools being a priority for the current financial year proposal.
