CHAVAKALI

The Chairman,
Ikolomani NG_CDF,
Kakamega.

Dear Sir/Madam,

I am writing to confirm the sustainability of the 250 graviera tree seedlings that we have requested for purchase, delivery, and planting at Ikhulili Primary School through the Ikolomani NGCDF grant program. We are grateful for this opportunity to contribute to the conservation of our environment.

We understand the importance of tree planting in the fight against climate change and are committed to ensuring the sustainability of the trees. We have put in place measures to ensure the survival of the trees and their long-term contribution to our environment. These measures include:

1. Maintenance: We will regularly maintain the trees by pruning and weeding. This will help the trees to grow strong and healthy and also minimize the competition for nutrients and water.
2. Protection: We will protect the trees from pests and animals that may destroy them. We will put up fencing around the trees and also use organic methods to control pests.
3. Education: We will educate our students and the surrounding community on the importance of trees in the environment and the need to protect them. We will also involve them in the planting and maintenance of the trees.
4. Regular watering: We will ensure that the trees receive adequate water throughout the year, especially during the dry seasons. We will have a schedule to ensure that the trees are watered regularly, and we will also involve our students in watering the trees to instill a sense of responsibility and ownership.

We are confident that with these measures in place, the 250 graviera tree seedlings will not only survive but also thrive and contribute significantly to the environment. We are committed to ensuring their sustainability and appreciate the opportunity to partner with Ikolomani NGCDF in this noble cause.

Thank you for your consideration.

Sincerely,

Cornel Makokha
Head Teacher, Ikhulili Primary School.
