Dear Madam,

**RE: REQUEST FOR TREES SEEDLINGS FOR ST. PHILOMENA NGURUNA
SECONDARY SCHOOL**

On behalf of St. Philomena Nguruna Secondary School, I am requesting for trees to plant in the school compound to keep our environment cool and to avoid soil erosion that is occurring during rainy seasons. This will help us to avoid the damages we experience during such seasons. The trees will also act as wind breakers since the area is prone to strong winds. They will also provide fruits for the children that learn in these institutions.

The school has two acres on which trees can be planted. There is a borehole that can supply enough water during dry spell to make sure that the trees do not dry. The students and pupils of St. Philomena Nguruna Secondary School and the Nguruna Primary school will be on the ground to take care of the planting and taking care of the trees.

We look forward to a positive response for the betterment of our environment.

Yours faithfully

Sarah K. Ong'ola
Principal/BOM Sec
