**RE: REQUEST FOR TREE SEEDLINGS FOR ST. PETER'S  
NYAMOTAMBE SECONDARY**

I am writing to request for seedlings as stated above. We are a public institution and willing to effect the presidential directive on planting of trees.

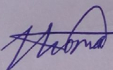

We have about 1 acre of land to plant within the compound and therefore one thousand (1,000) seedlings can be enough to plant the available space. The seedlings may be mixed up. That is, indigenous, fruits and other types.

We have water in school and so we can water them in case rains subside.

The school is well fenced and our student will be assigned a number of trees to ensure they grow.

We hope you will consider our request.

Yours faithfully,
